ALTAR Vampire Skin Therapy

“About the science, the active ingredient in Altar™ is SBD-4. SBD-4 is a patented extract from the root of the plant *Angelica sinensis*, which grows in the high altitudes of China, Japan, and Korea. SBD-4 has been demonstrated to do some rather remarkable things. One, it increases the microcirculation of the skin. The results of that are obvious, increased delivery of oxygen, increased delivery of nutrients and increased removal of unwanted metabolites through waste.

Two, SBD-4 is extremely rich in hyaluronic acid, which binds up to 100 times its weight in water, so it’s extremely hydrating.

Three, it’s extremely rich also in arginine, the amino acid that’s very important in maintaining and protecting and repairing the skin barrier. That’s the Reader’s Digest version of the science.”
